Next Generation ILT CanopyLight-13K Introduced

CanopyLight-13K Provides Increased, Focused Gas Pump Illumination without Polluting the Night Sky

Peabody, MA – International Light Technologies (ILT), a leading designer, manufacturer and distributor of LED-based lighting products, has introduced CanopyLight-13K™, the next generation of its popular gas pump canopy LED retrofit light fixtures.

All ILT CanopyLight™ LED retrofit fixtures are easy-to-install, cost-competitive replacements for existing energy-inefficient, high maintenance metal halide fixtures in gas pump canopies.

ILT CanopyLight-13K LED Retrofit Kits have a much higher light output (13,000 lumens) than previous versions of ILT's CanopyLight fixtures.

"A number of our customers requested that ILT produce a LED-based retrofit fixture that had all of the easy-to-install features of CanopyLight, but with significantly more focused light output", said Thom Connolly, ILT's President and CEO. "CanopyLight-13K is the result of those requests."

Pete Couture, CanopyLight Product Manager, added, "LED-based retrofit light fixtures for gas pump canopies must provide significant energy savings, customer safety and improved gas retail merchandising."

Retrofit Light Fixture**

"CanopyLight-13K meets all of these requirements with increased, but precisely directed light output with our innovative light distribution system. CanopyLight-13K helps gas station owners sell more gas more safely at night without polluting the night sky!"

Additional CanopyLight features include:

- Retrofit Canopy Light Lens Openings Up to 21.5" x 21.5" (2'x2' Drop Box)
- DLC Listed (DesignLights Consortium) - Utility Rebate Eligible
- No Canopy Cutting - Fast Installation, No Roof Leaks
- Light Focused on Gas Pumps & Fueling Areas - No Light Pollution
- Reduced Energy Consumption - Less Than 135 Watts vs. Over 350 Watts for Metal Halides
- 5 Year Warranty on CanopyLight & Power Supply

For more information, including a brief installation training video, please visit the ILT CanopyLight Web page at www.intl-lighttech.com/canopylight or call 978-818-6180.

About International Light Technologies (ILT):

For 50 YEARS, ILT has provided direct and OEM customers in commercial, industrial, academic and research markets with light measurement and detection systems, and a broad range of off-the-shelf and customized specialty light sources. The ILT LED Innovations Division designs and manufactures LED-based products including food/beverage/produce cooler and open/reach-in case lighting, gasoline pump canopy lighting, under cabinet and task lighting, and a complete line of LED sign modules for illuminated sign lighting.
